Saints Summer Experience

Sunscreen & Insect Repellent Policy

I understand that St. Andrew’s Episcopal School is diligent in their mosquito control efforts on campus during the summer months.

I understand that it is my responsibility to apply sunscreen (and insect repellent, if desired) to my child/camper at least 20 – 30 minutes before they arrive at camp each day.

I understand that I must send SPRAY sunscreen (and SPRAY insect repellent, if desired) with my child/camper to camp each week. The bottle(s) must be clearly labeled with their name and placed in a plastic Ziploc bag.

I understand that my child/camper will be prompted, when necessary, to re-apply sunscreen (or insect repellent, if needed) throughout the day. The camper is responsible for the application of sunscreen and/or insect repellent. Camp staff will assist with SPRAY product when necessary. Camp staff will NOT ASSIST with non-spray product.

I understand that camp staff will contact a camper’s parent/guardian if excessive sun/insect exposure occurs.
